I oppose HR 4026 and NAB's petition 04-160 regarding satellite radio's broadcast of local weather and traffic. It is clear that the NAB has been unwilling to allow any competition since the 1940's with TV, then FM radio, then satellite TV, then satellite radio.

Congress authorized satellite TV providers to broadcast local channels in 1999. The arguments used by cable companies and the NAB at that time were shown to be weak and self-serving. No one has suffered since satellite TV began broadcasting local channels. Thusly, no one will suffer with satellite radio broadcasting local weather and traffic.

Consumers run the country...NOT the NAB or its highly-paid lobby. Stop this insanity and highly undemocratic move before it goes further than it already has.

Thank you.
